ance Notes on Codes and Abbreviations" appearing at the begin-
ning of each regular issue of the PCT Gazette.

(54) Title: WIRELESS COMMUNICATION DEVICE PROVIDING A CONTACTLESS INTERFACE FOR A SMART CARD READER

(57) Abstract: A wireless terminal (30) including a smart card application host (34), such as a contact smart card or the terminal MCU or a terminal security component, and including a terminal interface (32), and also including a smart card router (33) that enables RF communication with a contactless card reader (35) in for example a ticketing system (31), even though the smart card application host (34) does not contain a contactless interface. The smart card router (33) includes an RF antenna (33c), separate from and external to the smart card application host (34), and also a modulator/ demodulator (33b), and also includes a card access module and router (33a) for routing communication traffic (R_{in}) arriving via the RF antenna (33c) to either the smart card application host (34) or to the terminal interface (32), based on information included in the arriving communication traffic (R_{in}).
